Gas heaters - Instructions

Before placing the bottle

- A. Confirm that there are no sparks, flames or anything incandescent nearby.

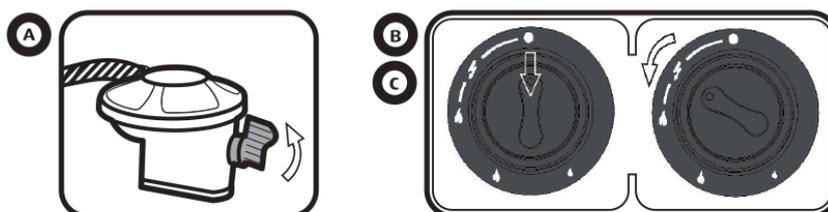

How to place the bottle

- A. Remove the rear heater door.
- B. Place the reducer on top of the bottle valve, pressing downwards, with the tab horizontally until you hear a "click".
- C. Place the bottle inside the heater, avoiding twisting the tube, and reassemble the rear door, fitting the tabs it has.

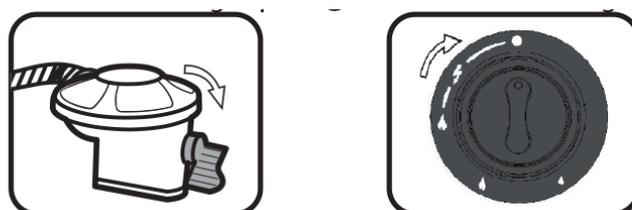

How to turn on

- A. Open the gas outlet on the bottle by turning the reducer lever.
- B. Press the button all the way down.
- C. Turn it anticlockwise and keep it pressed for 20 seconds. Repeat this movement once or several times until the pilot flame lights up near the bottom of the protective grille (where it releases the spark, and continue pressing the button for 10 seconds).
- D. If the flame does not light or goes out when you release the button, repeat the previous operation. (sometimes you may have to tap it a bit to light it completely).
- E. Then position the button at the heat setting you want (maximum, medium or minimum).

How to turn off

Close the gas outlet on the reducer by turning the lever on the reducer. Turn the heater control knob (clockwise). The flame will slowly extinguish.
